

Pseudo Code for Translation Engine Control Module

- CREATE Parameter Table from User Input A & B database characteristics and default values
- **INSTRUCT Synchronizer to initialize itself** 101.
- INSTRUCT Synchronizer to LOAD the History_File into its WORKSPACE 102.
- INSTRUCT B_Translator to LOAD all of B_records from B_Database and SEND to Synchronizer Synchronizer STORES these records in WORKSPACE) 103.
- Synchronizer services to read and write records in the WORKSPACE; Synchronizer maps these records using the B-A_Map before sending them to A_Translator and maps them back using A-B_Map before NSTRUCT A Translator to SANITIZE B records that were just LOADED (A Translator USES rewriting them into the WORKSPACE) 104
- Synchronizes STORES these records in WORKSPACE by first mapping then using the A-B_Map and INSTRUCT A_Translator to LOAD all of A_records from A_Database and SEND to Synchronizer them storing in their new form) 105.
- INSTRUCT B_Translator to SANITIZE A_records that were just LOADED (B_Translator uses Synchronizer services to read and write records in the WORKSPACE) 106.
 - NSTRUCT Synchronizer to do CAAR (Conflict Analysis And Resolution) on all the records in NORKSPACE. 107.
- NFORM user exactly what steps Synchronizer proposes to take (i.e. Adding, Changing, and Deleting ecords). WAIT for User 108.
 - IF user inputs NO, THEN ABORT

601

- INSTRUCT B_Translator to UNLOAD all applicable records to B_Database. INSTRUCT A_Translator to UNLOAD all applicable records to the A_Database. 110.
 - INSTRUCT Synchronizer to CREATE a new History File. 111. 112.

Pseudocode for Generating Parameter Table

{Get Input from the user}

ASK user to whether to synchronize based on a previously stored set of preferences (Previous_Preferences) or based on a set of new preferences (New_Preferences)

IF New Preferences THEN 151.

152.

153.

ASK user whether Incremental_Synchronization or Synchronization_from_Scratch

ASK user following information and STORE in Parameter_Table

A_Application and B_Application Names

ADB and BDB Names Ъ.

ပ

ADB and BDB Locations

Which sections to Synchronize d.

Conflict Resolution Option: IGNORE, ADD, DB WINS, BDB WINS, or NOTIFY

Other user preferences

ASK user whether wants default mapping for the selected sections of the two databases or wants to modify default mapping 154.

LOAD A Database-B Database (2)

IF Default_Mapping THEN

156. 157.

155.

STORE A-B_Map AND B-A_Map in Parameter_Table

END IF

159. 89.

158.

IF Modified_Mapping THEN

DISPLAY A-B Map and B-A Map

STORE the new A-B_Map and B-A_Map in the Parameter_Table ASK user to modify Maps as desired

163.

161.

162.

IF Previous Preferences THEN

ASK user whether Incremental Synchronization or Synchronization from Scratch 167.

STORE in Parameter Table 168.

LOAD Previous Preferences regarding which databases, mapping, and so on 169.

STORE in the Parameter_Table

END IF

170.

User now specifies Date Range}

ASK user to choose Date Range Option 172.

Previously chosen Automatic_Date_Range calculated from today

Input New Automatic_Date_Range

Input static Date Range for this Synchronization

All dates

CALCULATE Start_Current_Date_Range and End_Current_Date_Range based on values from step 171

STORE in Parameter Table 174.

LOAD parameters setting out characteristics of A Database and B Database from Parameters database,

including

Field_List_A and Field_List_B

A Translator and B Translator Module Identifiers ADB Section Names and BDB Section Name

STORE in Parameters Table 176.
